

## **Public Automatic External Defibrillators (AEDs)**

As part of the Bruce County Defibrillation Program and our Municipality, the Municipality has six (6) AEDs located within The Municipality of Northern Bruce Peninsula at the following locations:

- Municipal Office – front lobby area
- Lion's Head Community Centre and Arena
- Little Tub Harbour
- Lion's Head Marina
- Stokes Bay Community Centre
- Ferndale Information Centre

These are available for use by staff and the public only in the event of an emergency situation.

AEDs have become extremely important in an effort to save the lives of residents, employees and visitors of any given community.

There are other AEDs available throughout the Municipality; however, they have been purchased and maintained by organizations or the private sector.
