Re: EA Study Completion
Concession 4 Bridge, Sideroad 10 & Ira Lake Road Bridge
Municipality of Northern Bruce Peninsula

Dear Bill:

Please be advised that the amended CHER report of April 29, 2016 has been accepted and approved by the Ministry of Tourism, Culture and Sport (letter from Joseph Muller, Heritage Planner, June 14, 2016 attached). As this letter states, the Concession 4 and Sideroad 10 bridges do not have sufficient CHVI to warrant further examination. Hence, these projects can proceed to detailed design and construction of the selected preferred alternative.

As per the CHER conclusions, the Ira Lake Road Bridge is of sufficient CHVI to warrant a Heritage Impact Assessment Study to be completed prior to proceeding to detailed design.

Please be advised that the attached correspondence with Joseph Muller, WSP and the amended CHER study needs to be added to the project file posted on your website as documentation to verify the EA completion for this undertaking.

As you know, this EA study completion is valid for 10 years and allows Council this time to make the decision to proceed to detailed design and construction of these structures.

Should you have any questions, please contact me at your convenience.

Yours truly,

WSP Canada Inc.
