

BRUCE COUNTY UPDATES

Energy Transition Initiative available for Northern Bruce Peninsula Businesses

Bruce County has launched a new initiative to support and encourage local businesses to transition to lower carbon emissions sources of energy. The initiative will build connections between local businesses, suppliers of clean energy technology, and service providers, and aid in identifying eligible funding opportunities to make it easier to adopt cleaner energy solutions.

Bruce County businesses have the unique opportunity to lead the adoption in energy transition and leverage a network of resources, technologies, and expertise, to reduce their energy emissions and create more robust and sustainable businesses for the future.

The project is funded in part by the Ontario Ministry of Agriculture, Food and Agribusiness.
